

REMARKS

Patentees have received the Office Action dated June 11, 2009 in which the Examiner: 1) rejected claims 38-109 as based upon a defective reissue oath/declaration; and 2) objected to the amendments presented on November 7, 2008 for inclusion of underlining and brackets.

Patentees acknowledge with appreciation the allowability of claims 1-109 with filing of a proper oath/declaration and amendments that overcome the objections set forth in the Office Action.

I. OBJECTIONS TO THE AMENDMENTS TO THE SPECIFICATION/CLAIMS

The amendments presented above incorporate into the specification of the present application changes specified in a certificate of correction issued to Patent No. 6,046,968 on October 26, 2004. These amendments are intended to present no changes to the specification and claims other than those specified by the above referenced certificate of correction.

II. OATH/DECLARATION

A supplemental declaration has been provided that identifies at least one error in a specific claim relied on to support the reissue application. Specifically, the original patent failed to claim, in any of claims 1-37, a "clock reference structure having a spatial frequency that is within the spatial frequency spectrum of the data."

III. CONCLUSION

It is believed that no extensions of time or fees are required, beyond those that may otherwise be provided for in documents accompanying this paper. However, in the event that additional extensions of time are necessary to allow consideration of this paper, such extensions are hereby petitioned under 37 C.F.R. § 1.136(a), and any fees required (including fees for net
